

Scale Up
with Security

CLOUD COMPUTING

Scalable and Secure, Computing on the Cloud.

With Powersoft19's agile development processes and immense knowledge of cloud computing, organizations can enjoy reduced costs along with enhanced and secure data storage, and computing services. We empower consumers by addressing their CRM, computing, and data storage needs effectively. We help them in storing, sharing, and protecting their data easily with the added advantage of access from any "connected" device. Our knowledge of IoT plays a great role in this regard as well.

Companies are relying on technologies more than ever before, and increasingly fostering relationships based on trust. Therefore, secure cloud computing has become inherently important. As a result, enterprises are increasingly interested in SaaS, IaaS, PaaS, CaaS, and XaaS services.

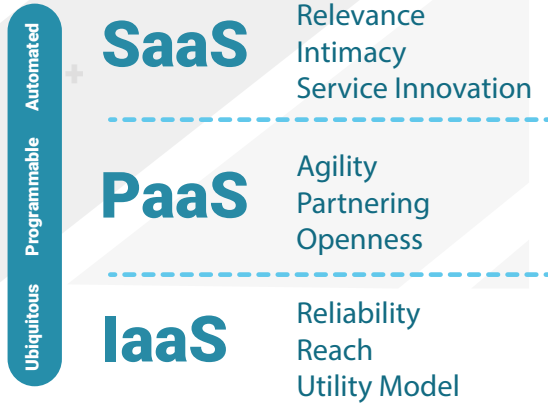

Consultancy
Integration
Implementation

Powersoft19's cloud computing services for data and storage security are customizable and tailored to provide multinationals with reduced operational costs and enhanced data security to scale up their ROI.

Our **Services**

- Cloud Managed Services
- Cloud for SAP Applications
- Cloud for Oracle Solutions
- Cloud Security Managed Services
- Advisory Services
- Cloud Adoption Services
- Enterprise Application Development
- Security Services
- Incident Handling
- Security Risk Handling
- Cloud Migration Services
