

Empowering Innovations in the Rail Industry

Overview

At Powersoft19, we bring a wealth of expertise and innovation to the Rail industry, redefining possibilities and solving challenges for our clients. Our commitment to excellence extends across a spectrum of services that span from concept to deployment, addressing the dynamic landscape of the rail sector. We design systems that conform to the highest safety standards with Safety Integrity Levels ranging up to SIL 3.

Next-Gen Solutions for Rail Operations

Our portfolio encompasses cutting-edge solutions designed to elevate rail operations into the future. From developing next-gen I/O controllers and remote diagnostic solutions to implementing computer-aided dispatch systems, we are at the forefront of technological advancements.

Intelligent Rail Yard Automation

Our expertise includes rail yard automation, offering efficient administration of spare parts, modular and expandable designs, and integrated yard automation platforms. We provide solutions that enhance reliability, availability, and overall efficiency.

Research and Development

We invest in ongoing research and development efforts as part of our commitment to staying at the forefront of technological advancements. This includes pioneering patents, proprietary technologies, and upcoming innovations that underscore our dedication to shaping the future of the rail industry. Our forward-thinking approach positions us to address emerging challenges and lead current trends, ensuring our clients benefit from the latest and most advanced solutions.

Enhanced Safety Solutions

Safety is paramount in the rail industry. Our innovative safety solutions reflect our commitment to ensuring secure operations. We cover a spectrum of safety measures from legacy product re-engineering to patent writing, branding, and digital marketing.

Digital Transformation for Rail Safety

In our pursuit of innovation, we've developed a next-gen roadway worker protection system. This proprietary wireless mesh network, coupled with multi-sensor technology—Radar, Lidar, machine vision, and accelerometer—ensures the weather-independent worker protection is in line with the FRA guidelines.

Tailored Services for Remote Control Locomotives

Powersoft19, as your partner in advanced rail technology, offers tailored services for remote control locomotives. Our expertise includes hardware, firmware, software design and development, preventive maintenance logging, and locomotives event recorder support. We ensure our services comply with FRA, ISO, IEEE, and AAR standards while incorporating cutting-edge technologies for robust and efficient rail operations.

Your Trusted Rail Technology Partner

With a proven track record in rail technology, *Powersoft19* is your reliable partner for innovation, safety, and efficiency. Whether it's preventive maintenance logging, event recorder support, or automatic time slotting, our capabilities position us as industry leaders dedicated to pushing the boundaries of what's possible in the rail sector.

Connect with us to transform your rail operations with cutting-edge technology and unparalleled expertise.

Contact Us

Drop us a line and let us know what we can do for you. There is no limit to what can be made possible with our passionate team. Here are some examples:

- › Come up with ideas to solve challenging issues faced by your business.
- › Execute complex project/product ideas.
- › Take the burden of managing legacy products off your shoulders.
- › Provide a skilled project team to augment your in-house resources.
- › Provide consultancy regarding industry standards and market trends.
- › Design a customized partnership model with *Powersoft19* that empowers you to beat the competition.
