Built for Innovation. Compliant by Design.

GDPR Compliance Services

Empowering Digital Innovation—Securely and Responsibly

At *Powersoft19*, data protection isn't a checkbox—it's built into the fabric of everything we design, build, and test. Our GDPR Compliance Services help organizations confidently deliver software, hardware, and cloud-based systems that align with EU data privacy regulations. Backed by our SQA and systems engineering teams, we ensure that every user interaction, data process, and architecture layer is secure, traceable, and accountable.

Challenges Businesses Face Today

GDPR has transformed how businesses handle personal data—but navigating compliance can be overwhelming. Key pain points include:

- Unclear visibility of where and how user data is stored or transferred
- Insecure data collection, logging, or consent mechanisms
- Gaps in documentation or audit-readiness
- Non-compliant third-party integrations
- Difficulty aligning legacy systems or AI models with privacy mandates

How We Solve It

Our GDPR compliance services are integrated across the SDLC—from requirements to release. Led by our QA experts, we assess and test your systems to verify data handling, user consent, access control, and retention policies. We also automate compliance checks, simulate breach scenarios, and validate third-party compliance. Whether it's an enterprise system, mobile app, or AI model, we make sure it's safe—and stays compliant.

Cross-Disciplinary GDPR Compliance & Validation Services

- Data inventory and classification
- PII/PHI data mapping across systems
- Consent handling and user rights testing
- Cookie behavior and consent banner validation
- Data encryption and masking validation (at rest/in transit)
- Access control, role-based restrictions, and audit trails
- Security vulnerability assessments
- Anonymization and pseudonymization effectiveness review
- GDPR-compliant AI/ML data pipeline validation
- Algorithmic transparency and explainability review
- Bias testing and risk scoring for decision automation
- Ethical AI compliance and recordkeeping
- Privacy policy review and alignment
- Data processing agreement (DPA) validation
- DPIA (Data Protection Impact Assessment) support
- Compliance reporting automation and dashboards

Data Protection and GDPR Compliance

Why *Powersoft19*?

- GDPR validation baked into QA, DevOps, and engineering
- Dedicated team of privacy-aware QA engineers
- Deep cross-functional understanding (apps, APIs, hardware, AI)
- Compliance integration with Agile/CI/CD pipelines
- Experience across fintech, healthtech, enterprise, SaaS, and government sectors
- Seamless collaboration with your DPO or legal teams

Privacy. Trust. Confidence. Expansion.

What You Gain

- Continuous compliance as your system evolves
- GDPR-ready systems that protect user data and brand reputation
- AI systems that are both innovative and responsible
- Reduced risk of penalties, breaches, and customer mistrust
- Transparent data practices and user-centric design
- Faster go-to-market for EU-targeted solutions

Turn Compliance Into a Competitive Advantage

Whether you're building software, hardware, or intelligent systems—*Powersoft19* helps you do it right. Let our QA experts make sure your solutions meet the highest standards of data privacy and trust. Explore GDPR-compliant engineering at our website or contact us for a readiness review.

Contact Us

Drop us a line and let us know what we can do for you. There is no limit to what can be made possible with our passionate team. Here are some examples:

- Come up with ideas to solve challenging issues faced by your business.
- Execute complex project/product ideas.
- Take the burden of managing legacy products off your shoulders.
- Provide a skilled project team to augment your in-house resources.
- Provide consultancy regarding industry standards and market trends.
- Design a customized partnership model with Powersoft19 that empowers you to beat the competition.
