SECURITY TESTING SERVICES

Secure Your Code. Safeguard Your Business.

Build with Confidence. Deploy with Security.

In a world where data breaches, ransomware, and zero-day vulnerabilities dominate headlines, security can no longer be an afterthought. At *Powersoft19*, we help organizations protect their digital assets through thorough, proactive, and intelligent security testing. Whether it's an app, an API, or your entire infrastructure, we simulate real-world attacks—so you stay one step ahead.

Unknown Vulnerabilities. Evolving Threats. High Stakes.

Today's connected ecosystems create countless potential entry points for malicious actors. Common challenges include:

- Insecure coding practices or legacy systems
- Lack of threat modeling or penetration testing
- Overreliance on static scanners with low detection rates
- Compliance requirements (e.g., GDPR, HIPAA, PCI-DSS, ISO 27001)
- Risk of reputational damage, data loss, and service downtime

Ethical Hacking Meets Engineering Rigor

We combine the best of manual penetration testing with automated scanning and AI-powered threat intelligence. Our process goes beyond surface-level scanning—probing for business logic flaws, misconfigurations, insecure APIs, and real-world exploitation paths. We provide not just findings, but actionable remediation, compliance insights, and full technical support to close the loop.

End-to-End Security Testing Services

Application Security Testing

- Static Application Security Testing (SAST)
- Dynamic Application Security Testing (DAST)
- Manual code review and OWASP Top 10 testing
- Security for web apps, mobile apps, and cloud-native platforms

Penetration Testing (Ethical Hacking)

- Black-box, white-box, and gray-box testing
- Internal/external network pentests
- Social engineering and phishing simulations
- Zero-day vulnerability simulation and risk scoring

API & Infrastructure Security

- REST/SOAP API fuzzing and token analysis
- Authentication/authorization testing (OAuth, JWT, SSO)
- Cloud security configuration reviews (AWS, Azure, GCP)
- Endpoint and server-side security validation

Compliance & AI-Driven Tools

- GDPR, HIPAA, PCI-DSS, ISO 27001 testing readiness
- AI-assisted anomaly detection in behavior and traffic
- Risk assessment reports with heatmaps and CVSS scoring
- Continuous monitoring and CI/CD pipeline security gates

Why *Powersoft19*?

• Certified ethical hackers (CEH, OSCP, CISSP) on staff
• Hands-on security testers with deep system-level knowledge
• Security testing integrated into agile, DevSecOps, and CI/CD pipelines
• AI-enhanced tools for smarter and faster vulnerability detection
• Experience across fintech, healthtech, industrial, SaaS, and government domains

What Do You Get?

Reduced risk of cyberattacks and data breaches

Stronger security posture across products and infrastructure

Faster resolution with actionable remediation plans

Greater customer trust and platform integrity

Smoother compliance with global regulations

Insights into root causes, not just symptoms

Resilience, Trust, and Compliance

Don't Wait for a Breach to Take Security Seriously

Let *Powersoft19* help you find the cracks before attackers do. From single applications to full-stack audits, we make security a strength—not a stress. Explore more our website or contact our cybersecurity team today.

Contact Us

Drop us a line and let us know what we can do for you. There is no limit to what can be made possible with our passionate team. Here are some examples:

- Come up with ideas to solve challenging issues faced by your business.

- Execute complex project/product ideas.

- Take the burden of managing legacy products off your shoulders.

- Provide a skilled project team to augment your in-house resources.

- Provide consultancy regarding industry standards and market trends.

- Design a customized partnership model with *Powersoft19* that empowers you to beat the competition.
