
Automate Quality. Accelerate Innovation.

Test Automation Services

Faster Releases. Higher Coverage. Lower Risk.

In today's continuous delivery world, manual testing can't keep up. At Powersoft19, we design and implement smart, scalable test automation strategies that help teams deliver faster without sacrificing quality. From UI to API to backend, our automation solutions are tailored to your tech stack, your release cycles, and your business goals—boosting velocity while improving product confidence.

Tight Timelines. Repetitive Tests. Growing Complexity.

Challenges Businesses Face Today

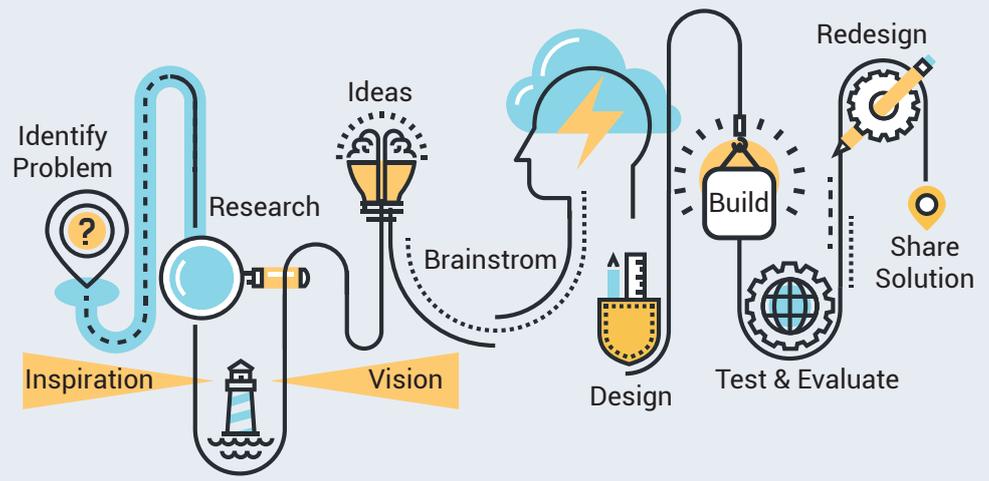

Modern development teams are under pressure to release quickly—but quality can't fall behind.

Common challenges include:

- Time-consuming manual regression testing
- Flaky or brittle test scripts
- Poor test coverage in fast-evolving codebases
- Integration gaps with CI/CD pipelines
- Lack of in-house automation expertise or strategy

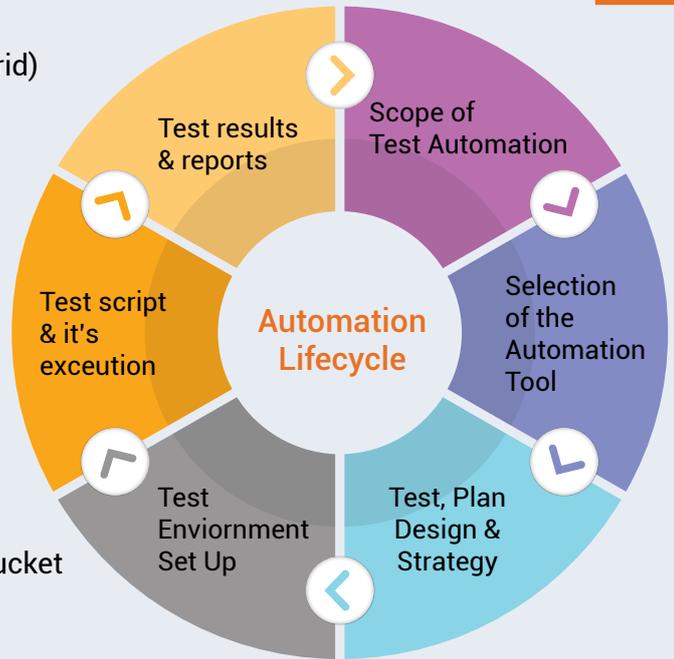

How We Solve It

In addition to automating tests, we build maintainable automation ecosystems. Starting with a deep dive into your systems, we architect flexible test frameworks, build reusable libraries, and integrate testing directly into your pipelines. With AI-enhanced capabilities, our test automation finds bugs faster, adapts to changes, and provides intelligent reporting that drives better decisions.

Full-Lifecycle Test Automation Services

- Automation feasibility study and ROI analysis
- Custom framework design (data-driven, keyword-driven, hybrid)
- Modular, reusable test libraries
- Scripting standards, versioning, and best practices
- UI automation for responsive and dynamic apps
- Cross-browser testing with Selenium, Cypress, Playwright
- Mobile automation with Appium, XCUITest, Espresso
- API automation with Postman, RestAssured, Karate
- Smart test generation and prioritization
- Self-healing test scripts and anomaly detection
- Visual validation and cognitive diff-checking
- AI-powered regression risk analysis
- Integration with Jenkins, GitHub Actions, Azure DevOps, Bitbucket
- Test triggers on pull requests, commits, and builds
- Automated reporting with dashboards and analytics
- Parallel test execution and container-based scaling

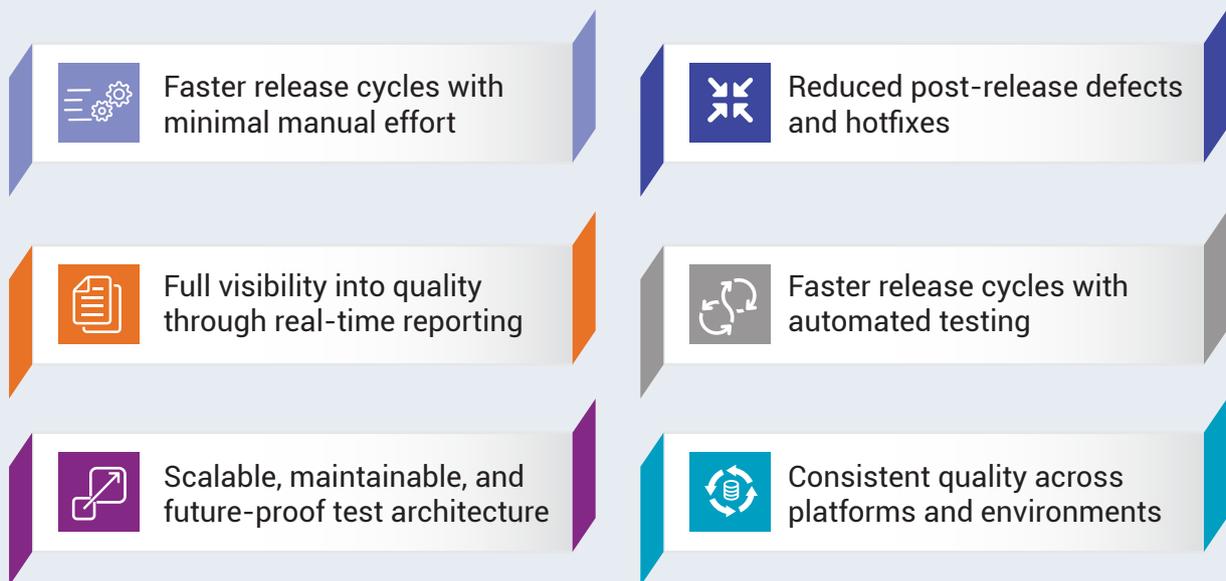

Why Powersoft19?

- 20+ years in QA automation across industries and platforms
- Certified engineers with experience in complex test environments
- AI/ML augmentation for smarter testing workflows
- Support for legacy, cloud-native, and hybrid apps
- Adaptable to your stack, tools, and team maturity

What Do You Get?

Speed, Stability, and Quality

Let's Take the Next Step?

Partner with *Powersoft19* to implement test automation that fits your workflows, scales with your team, and delivers lasting ROI. Explore our website or reach out to our automation experts today to learn more.

Contact Us

Drop us a line and let us know what we can do for you. There is no limit to what can be made possible with our passionate team. Here are some examples:

- Come up with ideas to solve challenging issues faced by your business.
- Execute complex project/product ideas.
- Take the burden of managing legacy products off your shoulders.
- Provide a skilled project team to augment your in-house resources.
- Provide consultancy regarding industry standards and market trends.
- Design a customized partnership model with *Powersoft19* that empowers you to beat the competition.
